Institution Furniture

We, a 33 year corporate, make and market furniture for educational institutions of any size and nature. Ours is the largest production facility in South India for institution furniture.

While quality of our product is directly proportional to durability, unbelievably the two are inversely proportional in pricing. Superior inputs viz., design, material, fully mechanical process are the premises for quality and durability. Still, assigning due weightage to competition and our sustained endeavor to offer reasonable prices, we adopt conservative pricing policy. The need based after sale service is another stich that holds our relationship firm with the client.

Furniture plays an extremely important part in the physical, moral and mental welfare of the scholars. Our gamut of furniture includes furniture for classroom, library, laboratory, administrative office, principal and chairman suite.
